

# VANTAA HOSPITAL'S VISITING INSTRUCTIONS AS OF MAY 1

- the maximum number of simultaneous visitors is 2 / patient
- the recommended duration of a visit is 15 minutes
- visitors must wear a surgical mask, which the unit will provide when required
- visitors must use hand sanitizer when entering the hospital, the ward, the room, as well as when exiting
- visitors may not have respiratory symptoms
- visitors must agree on the visit with the unit, when arriving at the ward
- these practices apply to visits taking place both indoors and outdoors

The care unit may grant case-specific exceptions to the above-mentioned restrictions, if at issue is a relative of a person in palliative care or an otherwise seriously ill person, or if an accompanying person is necessary to assist the patient. The care unit may use case-specific consideration for other justified reasons as well.

The purpose of the restrictions is to ensure the safety of the patients at the hospital.

*Let's protect our patients! Ensure the safety of patients by acting responsibly!*
